BUCCI®

BAR/COIL MULTI-SPINDLE MACHINES

# TRANS-COIL

EN

CNC multi-spindle transfer machines specifically designed for the machining of precision parts. Capability range is 2-20 mm OD from coils or non-rotating bars.

Up to 24 stations/clamping devices (collets or self-centering chucks).

Single or double production versions.

High precision recessing heads. High speed spindles.

- High precision;
- High efficiency;
- High productivity;
- Quick change over.

IT

Macchine transfer multi-mandrino CNC progettate specificamente per la lavorazione di pezzi di precisione diametro 2-20 mm da filo o da barra non rotante.

Fino a 24 stazioni/serraggio (pinze o morse autocentranti).

In configurazione a singola o doppia produzione.

Teste recesso ad alta precisione. Mandrini ad alti giri.

- Alta precisione;
- Alta efficienza;
- Alta produttività;
- Riattrezzamento rapido.

DE

CNC-Mehrspindelmaschinen speziell für die Bearbeitung von Präzisionsdrehteilen mit Durchmesser 2-20 mm aus Coils oder nicht rotierenden Stangen.

Bis zu 24 Stationen/Einspannen (Spannzangen oder selbstzentrierenden Schraub).

In der Einzel- oder Doppelproduktion-Konfiguration.

Hochpräzisionsplandrehköpfe. Hochgeschwindigkeitsspindeln.

- Hohe Präzision;
- Hohe Effizienz;
- Hohe Produktivität;
- Schnelles Umrüsten.
